

# NP-F 9100SG STANDARD GEL FBE FOR EXTERNAL PIPE COATING TECHNICAL DATA SHEET

## **Product Description:**

**Powder Properties:** 

<u>NP-F 9100SG</u> is a thermosetting Standard Gel Fusion Bonded Epoxy Powder designed for both as stand-alone FBE coatings and also as anti-corrosion primary layer in multi-layer pipe coating system. It is based on specially selected Epoxy resins and hardeners formulated in order to meet the specifications related to the external protection of underground steel pipelines.

<u>NP-F 9100SG</u> normally applied in the temperature range 230°C to 250°C up to 500 microns as a standalone anti corrosion coating, higher thickness can be applied for concrete weight coatings. It can be applied at lower temperature 190°C to 230°C when used as primer in three layer systems

<u>Operating Temperature:</u> NP-F 9100SG is suitable for operation at continuous temperature up to 100°C in dry conditions and maximum 80°C in wet conditions.
